

## How to use the GOH Foundation Coloring Book

**Finding A Coloring Page:** From the options, you can choose one of the categories on the top to get started.

**Using the Coloring Book:** You can color in with the **paint brush**, the **magic brush** or the **paint bucket**.

	The <b>paint brush</b> lets you paint wherever you want using the current color and brush size. Just hold down the mouse and move the paint brush around to color in.
	The <b>magic brush</b> is like the paint brush, but magically stays inside the lines.
	You change the brush size using the <b>size slider</b> . Drag to the left for a smaller brush and to the right for a larger one.
	The <b>paint bucket</b> will fill the area you click with the selected color.
	The <b>text tool</b> lets you type text onto your coloring page. This is a fun way to add a message to your picture. You can choose the color of the text from the color palette.
	You change the text size using the <b>text size slider</b> , and choose different text styles from the drop down.
	The <b>wash tool</b> cleans the area that you click (back to white).

## Paint Color

	Use the <b>palette</b> on the left to choose a paint color for the brush, magic brush, paint bucket, and text tool.
	You can also choose the special <b>random paint</b> which will change the paint color every time you use a brush or the bucket, or type another letter in the text tool.
	If you want to choose a color not on the palette, just click the <b>color selector</b> and choose exactly the color you need.

**Special feature:** Sometimes you just want to use a color you've already painted with. You can grab a color off the coloring page by holding down the [Ctrl] key. The tool changes temporarily to a dropper which can suck up the color you want.

## Save and Print

	When you've finished your coloring page you can click the <b>save</b> button to save a copy of the colored in picture.
	You can also print your finished coloring page, by clicking the <b>print</b> button to save a copy of the colored in picture.

## Picture Gallery

	We'd love to show off your finished coloring page in <a href="#">our gallery</a> . Click the <b>gallery</b> button to submit a picture.
